Specifications

All specification applies to 10X probe and All the SDS1000CNL Series Digital Storage Oscilloscopes.

To verify that the oscilloscope meets specifications, the oscilloscope must first meet the following conditions:

● The oscilloscope must have been operating continuously for thirty minutes within the specified operating temperature.

● You must perform the Do Self Cal operation, accessible through the Utility menu, if the operating temperature changes by more than 5° C.

● The oscilloscope must be within the factory calibration interval

All specifications are guaranteed unless noted "typical."
