

Features

- Allows to securely connect a working AC generator to thenational 3 x400V power grid.
- 2 meters indicate the presence and order of the phases.
- 1 central meter makes it possible to compare the voltageand frequency difference between the 3-phase 400Vnetwork and the AC generator, shows the best time toswitch on the synchronization.

**Specifications:**

Working voltage	400 V
Max current	16 A
Dimension	380 x 260 x 150 mm
Weight	6 kg
