

# Fume Extractor

## QUICK TF9

---

# Fume Extractor

## QUICKTF9

### Features

- Large flow, strong suction, specially designed for air purification of large equipment such as reflow oven, wave soldering, laser marking and PCB cutting etc.
- TF9 can exhaust indoor or outdoor according to the environment.
- Large capacity dust bag, combined with the bottom air inlet design, can accommodate more dust and achieve a longer consumable replacement cycle. Flame retardant material optional for use in special high temperature environment.
- Split type of design with four filters, which can be selected as per different applications.
- The unique intelligent filter reminder enables more accurate filter replacement cycle and avoids waste.
- Humanity design with LCD display, key lock, universal pulley wheel and filters replacement from the side door.
- TF9 can communicate with PLC or PC via RS48 for intelligent control.

### Specifications

Model	QUICK TF9
Power Consumption	750W
System Flow	950m <sup>3</sup> /h
Power Supply	220V
Static Pressure	3600Pa
Noise	≤70dB
Overall Dimension	1050*490*470mm
Weight	Around 54Kg

### Applications

TF9 has a wide range of applications, including solder fume filtration, laser cutting plastic, laser soldering and laser marking etc.

SMT Reflow Soldering

Manual Soldering

Laser Marking

Selective Wave Soldering

### Regular Accessories

Dust Bag

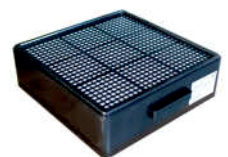

Fume Hose

Middle Filter

HEPA Filter

AC Filter
